

BTW 1000

Bulk Tank Weighing

Guarding Your Load[®]

Operator friendly display with clear indication of Load, Angle, and Capacity. The system can be configured for Load only, or Load and Angle.

Installation and calibration is very simple, with no cables required if Telemetry is selected as an option.

Sentinel designs and manufactures custom bulk tank monitoring systems to meet customer specific requirements. We understand that bulk tank weighing is tricky business and we have the experience to ensure your product or materials will be measured to a high degree of accuracy.

These devices are typically installed in new or in-service drilling rigs or other facilities to permit accurate measurement of dry or liquid bulk material weights. Digital monitoring displays are available for installation in close proximity to the bulk tanks or at remote locations (e.g., ballast control room, bridge control station).

Please contact your Sentinel Representative for product literature.

SENTINEL
The Load Management People[®]

Proudly Serving the Petroleum Industry Since 1984.

- Rugged Construction
- Outstanding Accuracy
- Easy Maintenance
- Simple Diagnostics
- Semi-automatic Calibration
- Solid State for Reliability
